

Rede Pecas

WhatsApp Conversation Script

Every message the bot can send, start to finish, in the order the pipeline can trigger it.
Example customer used throughout: Vivek, driving a Honda Accord 2003.

How to read this document

System	A message the bot sends to the customer over WhatsApp.
Customer	The customer's typed reply or button tap.
Buttons shown	Quick-reply buttons attached to the message above it.
Note	A branch, error case, or alternate path worth knowing about.

Contents

1. First Time Interaction with User
2. Vehicle Attachment with User
3. First Vehicle Ever vs. Ask-a-Part
4. AI Agent & Stock Search
5. Order Confirmation & Payment Method
6. Payment Proof & Staff Handoff
7. Staff Approval / Rejection
8. Returning-Customer Paths

STAGE 01 First Time Interaction with User

A brand-new phone number. Runs once per customer. NIF is the only optional branch.

CUSTOMER

Hi

SYSTEM

Welcome to Rede Pecas!
We're Angola's auto parts marketplace - we find the right parts for your vehicle as fast as possible.
To help you better, let's set up your profile quickly.
What's your name?

CUSTOMER

Vivek Makwana

SYSTEM

Nice to meet you, Vivek!
Do you have a NIF (tax ID) to include on invoices?
(useful if you're buying on behalf of a company)

Buttons shown:

Yes, I have a NIF

No, thanks

CUSTOMER

No, thanks

SYSTEM

What's your preferred delivery address?
Example: Bairro Morro Bento, Rua da Samba, No 12, Luanda
(reply "skip" if you'd rather provide it when placing an order)

CUSTOMER

Bairro Morro Bento, Rua da Samba, No 45, Luanda

SYSTEM

Profile created successfully, Vivek!
Next time you message us, I'll already recognize you.
Now I need to identify your vehicle. Pick an option:

Buttons shown:

I have the VIN

Send a photo

Manual entry

If "Yes, I have a NIF": the bot asks "Great! Type your NIF number", then continues straight to the address question above.

If the customer goes quiet mid-registration and returns later: "Let's continue your registration!" followed by the exact question for whichever step they stalled on.

STAGE 02 Vehicle Attachment with User

Three possible paths, all converging on the same Yes/No confirmation.

Path A - VIN

CUSTOMER

I have the VIN

SYSTEM

Perfect! Send the chassis number (VIN) - 17 characters, found on the vehicle document or stamped on the chassis itself.

CUSTOMER

1HGCM82633A004352

SYSTEM

Identifying the vehicle from the chassis number...

SYSTEM

Vehicle identified!
Honda Accord 2003 - 2.3L - Gasoline - Sedan
Is this your car?

Buttons shown:

Yes, that's it

No, different car

If the VIN isn't recognized by NHTSA: "I couldn't identify that chassis number. Let's fill in the details manually..." then continues straight into Path C below.

Path B - Document photo

CUSTOMER

Send a photo

SYSTEM

Perfect! Take a clear photo of the vehicle document (registration/title) and send it here.

CUSTOMER

[sends photo of the registration document]

SYSTEM

Got the photo. Reading the document's data...

SYSTEM

Data read from the document!
Honda Accord 2003 - 2.3L - Gasoline - Plate: LD-45-67-AB
Is this your car?

Buttons shown:

Yes, that's it

No, different car

Error cases, each offering "I don't have it" to drop to manual entry: couldn't download the image - error processing the document - image isn't a vehicle document - photo unreadable (lighting/focus/framing tips) - essential data (make/model) missing.

Path C - Manual entry

CUSTOMER

Manual entry

SYSTEM

No problem! Let's fill in the details manually.
What's the make of the vehicle?
Example: Toyota, Mercedes, Volvo...

CUSTOMER

Honda

SYSTEM

Honda
Now tell me the model of the vehicle.
Example: Hilux, L200, Actros, Sprinter, Ranger...

CUSTOMER

Accord

SYSTEM

Honda Accord
What year is the vehicle?
Example: 2015, 2018, 2020...

CUSTOMER

2003

SYSTEM

Honda Accord 2003
What's the engine number? (optional)
This number matters for engine parts, servicing, and maintenance.
If you don't know it, reply "don't know" and we'll continue.

CUSTOMER

don't know

SYSTEM

Great! I've saved your vehicle's details:
Honda Accord 2003
Now tell me which part you need and I'll search our stock.

An invalid year (not 4 digits, or out of the 1980-current+1 range) gets "Invalid year. Please enter the year with 4 digits." and re-asks the same step.

STAGE 03 First Vehicle Ever vs. Ask-a-Part

On a "Yes", the bot checks whether this is the customer's very first confirmed vehicle ever, or a returning/second one.

First vehicle ever

SYSTEM

You're registered with Rede Pecas, Vivek!
Honda Accord 2003
How can I help you today? Tell me which part you need and I'll search our stock right away.

Buttons shown:

Add vehicle

Already registered before - lighter prompt, no "profile created" copy

SYSTEM

Perfect!
Now tell me which part you need for your Honda Accord 2003.
Example: "oil filter", "brake pads", "timing belt"...

Buttons shown:

Add vehicle

2+ confirmed vehicles on file - vehicle picker runs first

SYSTEM

Which of your vehicles is this for?
1. Honda Accord 2003
2. Toyota Hilux 2018

CUSTOMER

1

An unrecognized reply gets "I didn't get that. Reply with just the vehicle's number." and re-asks. Once resolved, the same "tell me what part you need" message above fires for the chosen vehicle.

STAGE 04 AI Agent & Stock Search

Everything past this point is free text, handled by Claude - gated so the AI is never the customer's first reply.

CUSTOMER

oil filter

SYSTEM

One moment, checking our stock for you...

SYSTEM

I found 2 option(s) for oil filter for your Honda Accord 2003:

1. Bosch Oil Filter
Ref: OF-4471
Price: 8,500 Kz
Stock: 6 unit(s)
Delivery: 24h
Supplier: AutoPecas Luanda

2. Mann Oil Filter
Ref: OF-9012
Price: 11,200 Kz
Stock: 3 unit(s)
Delivery: 48h

Reply with the number of the option you prefer.

CUSTOMER

1

If make/model/year is missing and there's no vehicle on file, the AI asks ONE short clarifying question first - e.g. "timing belt for a Toyota Hilux" gets asked for the year, since it's critical for compatibility.

No stock found - offers the waitlist instead

SYSTEM

Unfortunately I couldn't find that part in stock right now. I can register your request and notify you when it's available. Want me to do that?

CUSTOMER

Yes

SYSTEM

Perfect! I'll let you know as soon as [part] is available.

A "No" reply gets "No problem!" instead. Weeks later, when that exact item is restocked, every waitlisted customer gets: "Good news! [part] is back in stock. Want to place an order?"

STAGE 05 Order Confirmation & Payment Method

The chosen option resolves against the numbered list saved a moment ago - a stale reply can't create a duplicate order.

SYSTEM

Order confirmed!

Attached is your proforma invoice for:
Bosch Oil Filter

Reference: RP-2026-00482
Total: 8,500 Kz
Valid for: 48 hours

After payment, send the proof here in this conversation.

SYSTEM

[PDF attachment: Proforma_RP-2026-00482.pdf]

SYSTEM

How would you like to pay?

Order: RP-2026-00482
Amount: 8,500 Kz

Choose an option:

Buttons shown:

Transfer / Deposit

Multicaixa Express

Mobile POS / Cash

CUSTOMER

Transfer / Deposit

SYSTEM

Would you prefer a bank transfer or a bank deposit?

Buttons shown:

Transfer

Deposit

CUSTOMER

Transfer

SYSTEM

Bank Transfer

Bank: BFA / BAI / BIC (your choice)
IBAN: AO06 0040 0000 XXXX XXXX XXXX X
Account holder: Rede Pecas, Lda
Amount: 8,500 Kz
Reference: RP-2026-00482 (required)

After the transfer, send the proof here (photo or PDF).

Other payment options (same structure, different details)

Button	Sub-choice	Proof?	What differs
Transfer / Deposit	Deposit	Yes	Account number instead of IBAN; "write the reference on the receipt" instead of "required on the transfer"
Multicaixa Express	(none - direct)	Yes	Phone number + amount; asks for a screenshot of the confirmation
Mobile POS / Cash	POS (card)	No	No proof step - staff is alerted directly to bring the terminal
Mobile POS / Cash	Cash on delivery	No	No proof step - staff is alerted that the customer pays cash on delivery

STAGE 06 Payment Proof & Staff Handoff

Only for the two proof-required methods above - the in-person pair skips straight to the staff alert.

CUSTOMER

[sends photo of the proof]

SYSTEM

Proof received!

Method: Bank Transfer
Order: RP-2026-00482

Our team will verify the payment and issue the invoice shortly.
Usually takes under 30 minutes during business hours.

Internal message - sent only to the staff phone, never the customer

SYSTEM

PAYMENT PROOF RECEIVED

Order: RP-2026-00482
Method: Bank Transfer
Amount: 8,500 Kz
Customer: 919313090929

Go to the panel to verify and approve:
<https://app.redepecas.ao/admin/orders>

For the in-person pair (POS / cash), the customer never sees a proof-request message - staff gets "IN-PERSON PAYMENT REQUESTED" directly, with an instruction to bring the terminal or collect cash on delivery.

STAGE 07 Staff Approval / Rejection

Happens outside WhatsApp, in the admin panel. Only the outcome reaches the customer.

Approved

SYSTEM

Official AGT Invoice Issued!
Your payment has been validated and the official invoice is now attached.
Thanks for shopping with Rede Pecas!

SYSTEM

[attachment: Invoice_RP-2026-00482.pdf]

In parallel, the supplier (not the customer) is notified to prepare the item for pickup - a failed send here is logged and never blocks the customer-facing approval.

Rejected

SYSTEM

Your order RP-2026-00482 was rejected.
Reason: payment proof not confirmed or invalid.
If you think this is a mistake, reply here and a staff member will help you.

No refund-tracking state exists by design - a rejection is message-only; "refunded within 3-5 business days" is conveyed verbally by staff if it applies, not by a bot message.

STAGE 08 Returning-Customer Paths

What a bare "Hi" does depends on two facts checked fresh every message: is the profile complete, and is there a confirmed vehicle on file.

Profile complete + vehicle on file - the common case

CUSTOMER

Hi

SYSTEM

Hey again, Vivek! Welcome back to Rede Pecas.

SYSTEM

Perfect!
Now tell me which part you need for your Honda Accord 2003.
Example: "oil filter", "brake pads", "timing belt"...

Buttons shown:

Add vehicle

Profile complete, no vehicle ever confirmed - confirmed vehicles never expire

CUSTOMER

Hi

SYSTEM

Welcome back, Vivek!
I still need to identify your vehicle. Pick an option:

Buttons shown:

I have the VIN

Send a photo

Manual entry

Adding another vehicle mid-conversation

Available any time after the first vehicle is confirmed - the button always sits alongside the ask-a-part prompt, and typing "add vehicle" free-text does exactly the same thing.

CUSTOMER

Add vehicle

SYSTEM

Let's identify your new vehicle. Pick an option:

Buttons shown:

I have the VIN

Send a photo

Manual entry

Repeats Stage 2 in full - the previous vehicle is never touched.

CUSTOMER

I have the VIN

SYSTEM

Perfect! Send the chassis number (VIN) - 17 characters, found on the vehicle document or stamped on the chassis itself.

CUSTOMER

1HGCM82633A004352

SYSTEM

Identifying the vehicle from the chassis number...

SYSTEM

Vehicle identified!
Honda Accord 2003 - 2.9L - Gasoline - Coupe
Is this your car?

Buttons shown:

Yes, that's it

No, different car

CUSTOMER

Yes, that's it

SYSTEM

Perfect!
Now tell me which part you need for your Honda Accord 2003.
Example: "oil filter", "brake pads", "timing belt"...

Buttons shown:

Add vehicle

No "profile created"/"registered" message this time - that copy is reserved for the customer's very first vehicle ever (see Stage 3).

CUSTOMER

Oil filter

SYSTEM

Which of your vehicles is this for?
1. Honda Accord 2003
2. Honda Accord 2003

CUSTOMER

1

SYSTEM

Perfect!
Now tell me which part you need for your Honda Accord 2003.

Now that 2 vehicles are on file, every future search resolves which one it's for first - see the vehicle-picker in Stage 3.

A bare greeting ("Hi" / "Hello" / "Hey") at any point always resets to the "what part do you need" question, even mid-conversation with the AI agent.
